Welcome Message

Dear Friends,

Greetings from Pune, India!

As the world recovers from a long pandemic and normalcy returns, we at the **Foundation for Research and Education in Endoscopy (FREE)** are happy to announce the **8th Edition of our Annual International Conference on IEE / ESD / Gastrointestinal Endosurgery** in a full physical and onsite format this year! The dates are **1st, 2nd & 3rd July 2022**, so do block your dates for this exciting event!

We are happy to announce that we have a galaxy of International Faculty, many of whom will travel in person to Pune to participate as well as several others who will join online! All our National Experts will be present in person @ Pune!

The focus of the meeting this year is to showcase a blend of Technology and Technique! During the last few years, there has been an explosion in technology for these procedures, and several new procedures have also been developed and evolved. On Day 1 of the conference, there will be a dedicated **Masterclass on IEE, Endoscopic Resections, and POEM** where beginners will learn the basic techniques by a step-by-step approach. Day 2 will feature dedicated sessions and symposia wherein faculty and industry will showcase, compare, and contrast various devices and technology in this exciting 'space!' The aim will be to present to the attendee a practical overview and optimal utilization of these technologies. These sessions will be accompanied by an extensive eighteen hours of live endoscopy from the Shivanand Desai Center for Digestive Disorders, Deenanath Mangeshkar Hospital and Research Center, Pune, India featuring a variety of procedures in this field. On Day 3, we shall host the much popular **Hands-on Training on ESD, POEM, along with additional hands-on sessions on Clip application and handling for mucosal and OTSC clips, use of 'Hybrid knife' and 'Speedboat' device, and endoscopic suturing**. Multiple specially curated hand-on sessions will provide excellent one-to-one interactivity between faculty and attendees.

For details of registration, scientific program, and other logistics, please visit our website **www.freendoscopy.com**. In case of any questions, we are also available on email – **freendoscopy@gmail.com** or on WhatsApp and phone on **+91 99215 33381** for any queries.

We look forward to welcoming you all to Pune to participate in this exciting course! The event is open for Indian as well as international participants. Travel to and within India is largely unrestricted and has resumed with full enthusiasm. Although there will also be a provision for limited virtual attendance, this will largely be one-sided. Therefore, for the best interactive experience with an opportunity for hands-on, don't miss this opportunity to visit Pune!
